

SPECIALIST DENTAL SEATING

About Us

Hello and welcome to our Dental Seating range literature. We have over 30 years experience in the upholstery business and over 15 years in the dental stool industry.

WE TAKE PRIDE IN OUR PRODUCTS AND CUSTOMERS NEEDS.

Our aim is to provide comfortable yet correct posture seating. We have an extensive colour range of fabric to match your dental chair and surgery decor.

All our products are made to order and can be adjusted where possible to meet with your requirements. Our seating ranges are available through distributors throughout the U.K. & E.U.

We also offer a re-upholstery service on most types of dental chairs which can reduce costs where cross infection issues can arise.

Please take time in reading the glossary, this will help in understanding the importance of choosing the correct seating for the surgeon and assistant who is equally as important as the patient.

Glossary

Free Float Mechanism this enables the angle of the seat and back rest to work together, to give permanent contact with the operator. Back rest maintains support to the natural curve of the back.

Tilt Action Seating area enables the operator to move closer to the patient.

Lockable When the correct position is found the levers can be pressed to lock the preferred operators working position if required.

Gas Lift/Height Adjustment This lever enables seat height to be adjusted to suitable working condition.

- To adjust height - lift lever unseated
- To lower height - lift lever whilst seated

Surgeon Stool uses a 9" Gas Cylinder which gives a working height from the floor to the centre of the seat approx. 500mm-630mm

Assistant Stool uses a 12" Gas Cylinder which gives a working height from the floor to the centre of the approx. 550mm-750mm

Foot Ring Helps maintain posture using as a foot rest only, resting the feet flat on the ring and thighs parallel to the floor.

Five Star Base Increased Stability

Twin wheeled castors Aids smooth movement

Torso Support/Ratchet Mechanism 360 degree adjustable support - Give supports and balance when leaning into patient for left or right handed operators. Adjustable Height gives additional comfort and support

Contoured/Formed Seating Area Aids comfort and movement

Off-Set-Assistant Stool Back rest/Arm rest/Torso Support Maintain support (stool illustrated shows bar off-set to right) The bar position can be change by unscrewing the 2 cap head screws and repositioning.

Saddle Seating Helps maintain the natural curve of the spine.

THE ABOVE FEATURES AID GOOD POSTURE AND REDUCE FATIGUE THROUGH OUT THE DENTIST AND ASSISTANT WORKING CAREER.

SADDLE SEATING Range

GMS10

The saddle seating gives a seating position allowing the spine to maintain a natural 'S' shape.

The saddle seating position enables you to turn and swivel while feet remain in contact with the floor maintaining in a central position which will support the back.

GMS15

This model can benefit a healthy posture by creating an open angle between the spine and thighs thus help maintain natural spinal curves.
