PrimeScan 2

Dentsply Sirona

DMI

The First Cloud-Native Intraoral Scanning Solution.

Beyond Wireless. Beyond Boundaries.

Capture scans directly to the cloud and access your workflow from virtually any internet-connected device. PrimeScan 2 combines the proven speed and precision of PrimeScan with the flexibility of cloud-native dentistry.

Scan Any Patient. Anytime. Anywhere.

Wireless freedom
Scan without limits using a lightweight, ergonomic and fully wireless scanner.

Cloud-native workflow
Scan data is captured directly to the cloud and sent to local software or file transfers.

No dedicated scanning computer required
Use virtually any internet-connected device—laptop, tablet or desktop.

Open and flexible integration
Seemlessly integrates with leading CAD/CAM and practice management systems.

Secure cloud storage and collaboration
Enterprise-grade security protects your data and enables real-time collaboration.

Powered by DS Core
The scalable, cloud-based platform built for the future of dentistry.
